m²

MAJOR INTERNATIONAL EVENTS

Our team has provided technical support for numerous high-profile international events. Our experience enables us to successfully manage events of any size and complexity.

◆ Kazan Forum

◆ Форум BRICS

◆ Игры будущего

◆ Олимпийские мероприятия в Сочи

◆ Международные конференции ОБСЕ

COMPLETE TECHNICAL EVENT SOLUTIONS

We provide comprehensive technical support throughout the entire event lifecycle — from infrastructure planning to on-site operation.

All key equipment is owned by the company, ensuring reliability, flexibility, and immediate availability.

Our Services

- Simultaneous Interpretation Systems
- LED Display Solutions
- Professional Audio Systems
- Live Streaming
- Conference Systems

WHY EVERY MAJOR EVENT NEEDS A TECHNICAL PARTNER

Modern business events rely on a complex combination of integrated technologies.

Audio systems, presentation equipment, LED displays, interpretation systems, cameras, and live streaming must operate as one synchronized infrastructure.

That is why organizers of international forums and conferences work with professional technical partners responsible for ensuring the seamless operation of the entire technical environment.

Our Technical Partner Responsibilities

- Technical infrastructure planning
- Equipment selection
- Professional installation and system configuration
- On-site engineering support throughout the event

SIMULTANEOUS INTERPRETATION

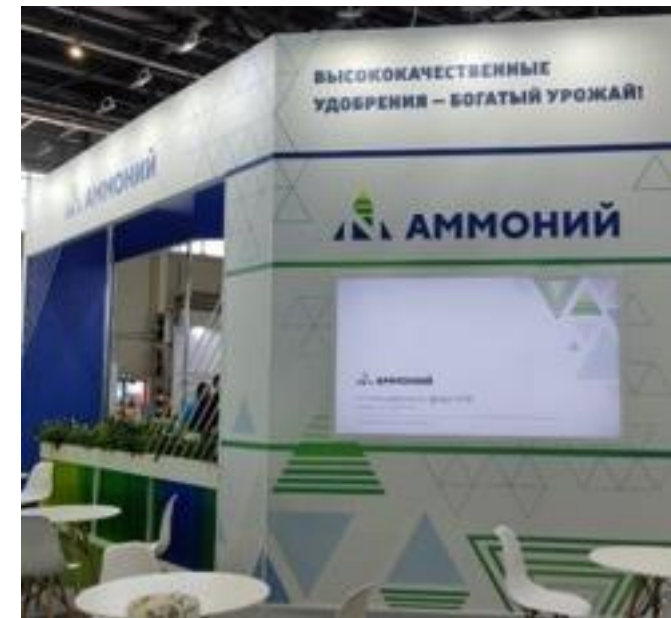

Simultaneous interpretation systems are essential for international conferences, congresses, and business forums.

We provide fully equipped interpreter booths together with individual wireless receivers for participants.

Capabilities

- Up to 8 languages simultaneously
- More than 2,500 receivers
- Coverage of up to 4,000 m²

LED DISPLAY SOLUTIONS

LED displays are the centerpiece of modern event production.

They are used for presentations, video content, live broadcasting, and stage design.

We provide:

- Stage LED Screens
- LED Video Walls
- Digital Information Displays

LIVE STREAMING

We organize professional live broadcasts for remote audiences.

Hybrid event solutions allow on-site participants and online viewers to engage simultaneously.

Services Include

- Streaming to customer platforms and social media
- Remote speaker integration
- Event recording

CONFERENCE & AUDIO SYSTEMS

Professional conference systems are designed for meetings, congresses, panel discussions, and board sessions.

We use equipment from globally recognized manufacturers:

- Bosch
- Sennheiser
- Beyerdynamic
- Yamaha
